

For United States Patent and Trademark Office at entering into National US phase. Declaration about Replacement of parts of Specification
(at entering at National US phase).

Paris, 14th February 2001

Application N°PCT/IB00/00843, Applicant and Inventor Y.Zagyansky

I, sole and independent inventor of this application, hereby claim that the replaced parts of Specification (pages 27-30 and 50-51) of this invention absolutely and evidently do not contain the new elements. They contain only the trivial corrections of (ONLY!) my calculations (with virgin very inventive new physical basis, that could not find [in trying long time!] ALL greatest Physicists of XX century, including Einstein, Lorentz, Michelson and Maxwell PERSONALLY!), concerning Michelson measuremens WITHOUT ABSOLUTELY ANY INVENTIVE STEPS, that, moreover, resulted IN THE SAME FINAL QUANTITATIVE DATA (without ANY influence on ANY claim and on International Search), because the solidity of this invention of century was guarantied by a number of factors and with large security.

Inventor of this invention

Dr. Y.Zagyansky (Dir.Rech.Equ.)

Supplements: 1. Replaced clear pages 27,28,29,30,50,51 of this invention (each in 3 copies).

2. These, new made pages (27-30, 50, 51) with original ones (27-30, 50, 51), ar ALL underlined with blue transparent felt-tip, at all changed elements (each in 1 copy).

Yuliy Zagya

(It was not needed to give pages 50, 51 original in 1 copy "blue".)

Yuliy Zagya
